Validated Intakes Data 08-11-15

Nine sediment samples were collected from nine locations on Tuesday August 11, 2015 along the Animas and San Juan Rivers. The metal concentrations of the sediment samples were over a factor of 10 lower than soil/sediment recreational screening levels.

Boldness is the act of responding to a situation in a manner that may be viewed as daring to some, but is essential to effectively address the issue at hand.

Boldness is a strategic tactical approach to a given situation. It requires good situational awareness, strong nerves and craftiness.

Boldness involves taking risks and when you decide upon a course of action, boldness demands that you execute it aggressively.

Boldness is a spirited word that eloquently describes bravery. It takes a great deal of boldness to confront your true dreams your aspirations your passions. It also take boldness to confront tackle the issues in

difficult challenges that exist in today's society with a straightforward approach.

Boldness isn't inherited, It's a characteristic that will blossom with the determination you have to live an uncommon life of bravery. It is a choice.

Your challenge today is to act with boldness in every situation. Speak up, act with complete confidence and expect that things will go your way. Expect to win, to have outstanding day, achieve every goal you set.
